THE TOMEY TCP-SERIES

QUALITY IN DETAIL

We fulfill all your needs!

Whether you like a basic model or a high-end sophisticated model – we have it all!

The Tomey chart panels offer the entire tests for refraction, starting from standard optotypes followed by special tests for driving license, colour vision, contrast sensitivity or polarising tests. Of course all charts, necessary for conventional refractive test, are already pre-programmed. For patient education you can show and create various pictures and animations. The test report function allows to generate and print individual reports. Choose your individual monitor up to your needs!

iPAD APP

You want to control your chart panel via iPad?
The app „**Chart Max**“ works with:

- TCP-2000A
- TCP-2000P
- TCP-3000P
- TCP-3000PX

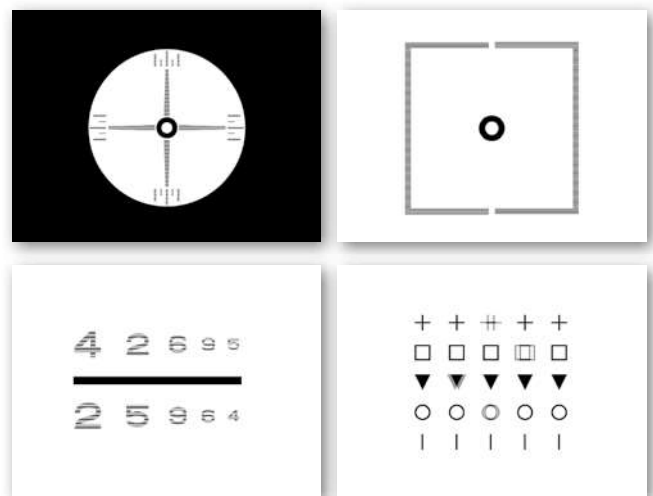

Use the **Chart Max** to control your Tomey chart panel via wireless network. The App works as an easy to use remote control with full functionality, live image of displayed optotypes and reading test samples.

TCP-3000P 24”

- High-quality all-rounder with extensive polarising test chart selection and integrated PC

Polarised test charts (samples)

TCP-3000PX 24”

When it comes to correction of associated Heterophoria the **TCP-3000PX** provides the complete and latest standard of a chart displaying monitor – not even because of its brilliant separation for right and left eye.

The **TCP-3000PX** fulfills all essential requirements for a perfect performance.

- Direct or mirrored display
- Special test sequences (MKH)
- Adequate large test field frame for non fixation impulse
- Tests presented with sufficient contrast
